Returns greater than 1 year period are compounded annualized (CAGR). N.A. Not Available. The Scheme, formerly a large cap fund, has undergone change in Fundamental attributes w.e.f. May 23, 2018 and become a Large and Mid-cap Fund. Accordingly, the Scheme's benchmark has also changed. HDFC Growth Opportunities Fund has been renamed as HDFC Large and Mid Cap Fund w.e.f. June 28, 2021. Hence, the past performance of the Scheme may not strictly be comparable with that of the new benchmark. As BSE SENSEX TRI data is not available since inception of the scheme, additional benchmark performance is calculated using composite CAGR of BSE SENSEX PRI values from February 18, 1994 to August 18, 1996 and TRI values since August 19, 1996. \$\$ All Distributions declared prior to the splitting of the Scheme into IDCW & Growth Options are assumed to be reinvested in the units of the Scheme at the then prevailing NAV (ex-distribution NAV). For performance of other schemes managed by Gopal Agrawal, please refer page 101. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 106 to 112.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

Returns greater than 1 year period are compounded annualized (CAGR). N.A. Not Available. Scheme performance may not strictly be comparable with that of its Additional Benchmark in view of balanced nature of the scheme where a portion of scheme's investments are made in debt instruments. \$\$ All Distributions declared prior to the splitting of the Scheme into IDCW & Growth Options are assumed to be reinvested in the units of the Scheme at the then prevailing NAV (ex-distribution NAV). As NIFTY 50 TRI data is not available since inception of the scheme, additional benchmark performance is calculated using composite CAGR of NIFTY 50 PRI values from February 1, 1994 to June 29, 1999 and TRI values since June 30, 1999. For performance of other schemes managed by Gopal Agrawal, Srinivasan Ramamurthy, Arun Agarwal, Nandita Menezes & Anil Bambole, please refer page 101. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 106 to 112.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

Note: @@Effective close of business hours of June 1, 2018, HDFC Prudence Fund merged with HDFC Growth Fund (HDFC Balanced Advantage Fund after changes in fundamental attributes). As the portfolio characteristics and the broad investment strategy of HDFC Balanced Advantage Fund is similar to that of erstwhile HDFC Prudence Fund, the track record (i.e. since inception date, dividend history, etc.) and past performance of erstwhile HDFC Prudence Fund has been considered, in line with SEBI circular on Performance disclosure post consolidation/ merger of scheme dated April 12, 2018.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

HDFC Hybrid Equity Fund

An open ended hybrid scheme investing predominantly in equity and equity related instruments

CATEGORY OF SCHEME
AGGRESSIVE HYBRID FUND

INVESTMENT OBJECTIVE: The investment objective of the Scheme is to generate capital appreciation / income from a portfolio, predominantly of equity & equity related instruments. The Scheme will also invest in debt and money market instruments. There is no assurance that the investment objective of the Scheme will be achieved.

Assuming ₹ 10,000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return) for Regular Plan - Growth Option. The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital.

Returns greater than 1 year period are compounded annualized (CAGR). N.A. Not Available. Scheme performance may not strictly be comparable with that of its Additional Benchmark in view of hybrid nature of the scheme where a portion of scheme's investments are made in debt instruments. For performance of other schemes managed by Srinivasan Ramamurthy & Anupam Joshi, please refer page 101. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 106 to 112.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

Note: @@ Effective close of business hours of June 1, 2018, HDFC Balanced Fund merged with HDFC Premier Multi Cap Fund (HDFC Hybrid Equity Fund after changes in fundamental attributes). As the portfolio characteristics and the broad investment strategy of HDFC Hybrid Equity Fund is similar to that of erstwhile HDFC Balanced Fund, the track record (i.e. since inception date, dividend history, etc) and past performance of erstwhile HDFC Balanced Fund has been considered, in line with SEBI circular on Performance disclosure post consolidation/ merger of scheme dated April 12, 2018.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

Returns greater than 1 year period are compounded annualized (CAGR). N.A. Not Available. The Scheme formerly, a debt oriented hybrid fund, has undergone change in Fundamental attributes w.e.f. May 23, 2018 and become a multi asset fund investing in equities, debt and gold related instruments. Accordingly, the Scheme's benchmark has also changed. Hence, the performance of the Scheme from inception till May 22, 2018 may not strictly be comparable with those of the new benchmark and the additional benchmark. Scheme performance may not strictly be comparable with that of its Additional Benchmark in view of hybrid nature of the scheme where a portion of scheme's investments are made in debt instruments and gold related instruments. For performance of other schemes managed by Srinivasan Ramamurthy, Anil Bamboli, Bhagyesh Kagalkar, Arun Agarwal & Nandita Menezes, please refer page 101. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 106 to 112.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

Returns greater than 1 year period are compounded annualized (CAGR). N.A. Not Available. Scheme performance may not strictly be comparable with that of its Additional Benchmark, since a portion of scheme's investments are made in debt instruments. For performance of other schemes managed by Srinivasan Ramamurthy, Anil Bamboli, Arun Agarwal & Nandita Menezes, please refer page 101. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 106 to 112. @Effective December 16, 2015, certain changes, including changes to fundamental attributes, were effected in the erstwhile HDFC Multiple Yield Fund, (an open ended income scheme) which was renamed as HDFC Equity Savings Fund, an open ended equity scheme. On account of these changes, the performance during the period(s) from September 17, 2004 to December 15, 2015 is not comparable.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

HDFC Hybrid Debt Fund

An open ended hybrid scheme investing predominantly in debt instruments

Returns greater than 1 year period are compounded annualized (CAGR). Scheme performance may not strictly be comparable with that of its Additional Benchmark in view of hybrid nature of the scheme where a portion of scheme's investments are made in equity instruments. For performance of other schemes managed by Srinivasan Ramamurthy & Shobhit Mehrotra, please refer page 101. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 106 to 112.

Note: Effective close of business hours of May 25, 2018, HDFC MF Monthly Income Plan - Long Term Plan (MIP-LTP) underwent changes in Fundamental Attributes and was renamed as HDFC Hybrid Debt Fund (HHDF) and HDFC MF Monthly Income Plan - Short Term Plan was merged therein. As the portfolio structuring of HHDF closely resembles the erstwhile MIP-LTP, the past performance of MIP-LTP is provided, in line with SEBI circular on Performance disclosure post consolidation/ merger of scheme dated April 12, 2018.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

Returns greater than 1 year period are compounded annualized (CAGR). Scheme performance may not strictly be comparable with that of its Additional Benchmark in view of hybrid nature of the scheme where a portion of scheme's investments are made in debt instruments. For performance of other schemes managed by Srinivasan Ramamurthy, Shobhit Mehrotra, Nandita Menezes and Arun Agarwal, please refer page 101. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 106 to 112.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

Returns greater than 1 year period are compounded annualized (CAGR). N.A. Not Available. For performance of other schemes managed by Anupam Joshi & Praveen Jain, please refer page 101. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 106 to 112.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

Returns greater than 1 year period are compounded annualized (CAGR). For performance of other schemes managed by Shobhit Mehrotra, please refer page 101. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For performance of Direct Plan, refer page 106 to 112.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

Returns greater than 1 year period are compounded annualized (CAGR). For performance of other schemes managed by Anil Bamboli, please refer page 101. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 106 to 112.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Returns greater than 1 year period are compounded annualized (CAGR). N.A. Not Available. For performance of other schemes managed by Anil Bamboli, please refer page 101. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 106 to 112.

^Past performance may or may not be sustained in future and is not a guarantee of any future returns. Load is not taken into consideration for computation of performance.

This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

Returns greater than 1 year period are compounded annualized (CAGR) For performance of other schemes managed by Srinivasan Ramamurthy & Anil Bamboli, please refer page 101. Different plans viz. Regular Plan and Direct Plan have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged in the Regular Plan. For Performance of Direct Plan, refer page 106 to 112. Scheme performance may not strictly be comparable with that of its Additional Benchmark in view of hybrid nature of the scheme where a portion of scheme's investments are made in equity instruments
