Nippon India Small Cap Fund

Small cap Fund

Details as on October 31, 2025

Type of Scheme

An open-ended equity scheme predominantly investing in small cap stocks.

Current Investment Philosophy

The fund attempts to generate relatively better risk adjusted returns by focusing on the smaller capitalization companies. Small cap stocks, for the purpose of the fund are defined as stocks whose market capitalization is below top 250 companies in terms of full market capitalization. Small cap companies are potential mid caps of tomorrow and offer twin advantage of high growth prospects & relatively lower valuation. The fund focuses on identifying good growth businesses with reasonable size, quality management and rational valuation. The investment approach adopts prudent risk management measures like margin of safety and diversification across sectors & stocks with a view to generate relatively better risk adjusted performance over a period of time.

Nippon India Balanced Advantage Fund

Balanced Advantage Fund

Details as on October 31, 2025

Type of Scheme

An Open Ended Dynamic Asset Allocation Fund.

Current Investment Philosophy

The fund attempts to capitalize on the potential upside in equity markets while attempting to limit the downside by dynamically managing the portfolio through investment in equity and active use of debt, money market instruments and derivatives. A model based Dynamic Asset Allocation Fund that aims to offer three benefits: 1. Emotion free asset allocation through model based asset allocation. 2. Lowers downside risk through hedging. 3. Generates long term alpha through active stock selection and sector allocation. The fund follows an in-house proprietary model (which follows valuations & trend following) to determine unhedged equity allocation.

The fund maintains a large cap oriented portfolio diversified across sectors. The debt portfolio is managed conservatively, focused at the shorter end through investment in a combination of liquid and short term fixed income securities.

Arbitrage Fund	
Details as on October 31, 2025	
Type of Scheme	
An open ended scheme investing in arbitrage opportunities.	
Current Investment Philosophy	
A conservative arbitrage fund that aims to generate income through arbitrage opportunities arising out of pricing mismatch in a security between cash and derivative segment and with derivatives segment along with investments in debt securities and money market instruments. The fund portfolio is completely hedged and takes offsetting positions on various markets simultaneously. The arbitrage fund follows a market neutral strategy and carries no specific equity risk. In the absence of adequate arbitrage opportunities, the scheme may invest in short term debt or money market securities.

Multi Asset Allocation

Details as on October 31, 2025

Type of Scheme

An open ended scheme investing in Equity, Debt and Exchange Traded Commodity Derivatives and Gold ETF & Silver ETF

Current Investment Philosophy

The fund invests in a combination of Equity, Debt, International Equity, Gold ETF/ Exchange Traded Commodity Derivatives (ETCD), Silver ETF/ Exchange Traded Commodity Derivatives (ETCD) and other ETCDs as permitted by SEBI from time to time. Since these asset classes are weakly/ negatively co-related and tend to perform at different periods of time, the fund seeks to benefit from portfolio diversification. Given that asset allocation is the key to wealth creation, this fund would be an ideal offering for investors seeking a one stop solution to reap the benefit of Growth of Equity, Stability of Debt & Diversification from Commodities.

Nippon India Retirement Fund - Income Generation Scheme

Fixed Income - Retirement

Details as on October 31, 2025

Type of Scheme

An open ended retirement solution oriented scheme having a lock-in of 5 years or till retirement age (whichever is earlier).

Current Investment Philosophy

The fund's investment objective is to provide capital appreciation and consistent income to the investors which will be in line with their retirement goals by investing in fixed income oriented portfolio with a low to moderate exposure (upto 30%) in equities. Thus the fund attempts to generate potentially higher returns by combining stability of fixed income along with growth possibilities of equities. On the fixed income allocation the fund will attempt to have an optimal blend of duration and accruals with investments in high quality instruments. The equity portfolio will be invested pre-dominantly in large cap companies with tactical allocation to mid cap stocks. The fund is well suited for investors in the post - retirement phase seeking regular income with lower volatility.
