Quantitative Information

Portfolio Beta, Standard Deviation, Sharpe Ratio and Tracking Error of the Scheme is not computed since the scheme has not completed 3 years from its inception.

Investment Objective

The primary objective of the scheme is to generate long term capital appreciation by investing in and managing a diversified portfolio of equity and equity related instruments of large and mid cap companies. There is no assurance that the investment objective of the Scheme will be achieved.

Why to Invest in WhiteOak Capital Large & Mid Cap Fund ?

- The scheme aims to capture opportunities available primarily in large and mid-cap space, as large cap may provide optimal stability and liquidity, whereas mid & small cap have the potential to offer higher returns, albeit high volatility.
- The scheme intends to have a small allocation to small cap companies. Small and Mid-Cap segment may create higher alpha generation opportunities since it has availability of broad spectrum of diversified and niche businesses and needs to be more researched. large in-house research capabilities matter a lot for identifying winners in this segment.
- The scheme aims to create a factor diversified balanced portfolio to provide better investment experience with low alpha volatility. Without sector and style biases, the scheme strives to achieve portfolio diversification and risk mitigation, reducing reliance on concentrated bets.

Quantitative Information

Portfolio Beta, Standard Deviation, Sharpe Ratio and Tracking Error of the Scheme is not computed since the scheme has not completed 3 years from its inception.

Investment Objective

The primary objective of the Scheme is to provide long-term capital appreciation/ income by investing across market capitalisations and managing a diversified portfolio of Large Cap, Mid Cap and Small Cap Stock. There is no assurance that the investment objective of the Scheme will be achieved.

Why to Invest in WhiteOak Capital Multi Cap Fund ?

- Scheme aims to capture opportunities available in all three-market cap space i.e., large, mid & small cap with minimum allocation of 25% to each market cap.
- The portfolio strives to maintain a significantly high active share, a crucial factor in generating potential alpha over an extended period (Active share quantifies how much of the portfolio differentiates from the benchmark).
- The scheme intends to have reasonably higher allocation to small and mid-cap companies. Small and Mid-Cap segment provides higher alpha generation opportunities since it has availability of broad spectrum of diversified and niche businesses and is relatively less researched.
- The scheme aims to create a factor diversified balanced portfolio to provide better investment experience with low alpha volatility. Without sector and style biases, the scheme strives to achieve portfolio diversification and risk mitigation, reducing reliance on concentrated bets.

Top 10 Industry Allocation (% to Net Assets)

Industry Classification as recommended by SEBI/AMFI
Derivatives are considered.

Market Cap Allocation (% to Net Assets)

⁶SEBI vide its circular no. SEBI/IMD/CIR No. 4/ 168230/09 dated June 30, 2009 has decided that there shall be no entry Load for all Mutual Fund Schemes.

Quantitative Information

Portfolio Beta, Standard Deviation, Sharpe Ratio and Tracking Error of the Scheme is not computed since the scheme has not completed 3 years from its inception.

Investment Objective

To generate long-term capital appreciation by investing in opportunities presented by special situations such as corporate restructuring (including mergers & acquisitions etc.), government policy and/or regulatory changes, technology led disruption and innovation, new trends, new & emerging sectors, companies/sectors going through temporary unique challenges and other similar instances. There is no assurance that the investment objective of the Scheme will be achieved.

Why to Invest in WhiteOak Capital Special Opportunities Fund ?

- > A large and experienced analysts' team tracking Special Situations Opportunities in the market.
- > The Scheme aims to capitalize on special situations created in the market, tracking specific news, events, incidents that can impact a particular stock, sector, or economy.
- > The aim of the Scheme is on being ahead of the curve, i.e., identifying Special Situations well in advance and capitalizing on them before the market fully factors in the outcome.
- > The risk-reward profile makes the Scheme an attractive option for those who understand and are comfortable with the potential volatility.

Quantitative Information

Portfolio Beta, Standard Deviation, Sharpe Ratio and Tracking Error of the Scheme is not computed since the scheme has not completed 3 years from its inception.

Investment Objective

The primary objective of the Scheme is to provide long term capital appreciation and generate income from a dynamically managed portfolio of equity & equity related instruments and debt & money market securities. There is no assurance that the investment objective of the Scheme will be achieved.

Why to Invest in WhiteOak Capital Balanced Advantage Fund ?

- Helps to remove psychological barrier (Greed & Fear) for its investors by investing in a dynamically managed portfolio of equity & equity related instruments and debt & money market securities.
- Scheme utilizes proprietary in-house Market Valuation Index to decide Net Equity Levels.
- Scheme allocates Higher in Equity when Equity Market Valuation is Low and Lower when Equity Market Valuation is High, thus benefits from market volatility.
- Seeks to invest in arbitrage opportunities in India Equities while maintaining net equity levels between 30%-80%.
- Endeavors to deliver better investing experience over full market cycle by reducing downside during falling market and providing reasonable participation during rising market.

Investment Objective

To provide long term capital appreciation and generate income by investing in instruments across multiple asset classes viz. Equity, Debt and Gold/silver related instruments. There is no assurance that the investment objective of the Scheme will be achieved.

Why to Invest in WhiteOak Capital Multi Asset Allocation Fund?

- Scheme offers diversification across various asset classes like different asset classes like domestic equity & related instruments, Gold, Fixed income, Foreign Equity etc.
- Economic Cycles and Markets across the globe are very dynamic and it is not possible to consistently time the winning asset class, but a right mix of these asset classes may help investors achieve optimum level of risk adjusted return.
- Scheme invests in various asset classes using internal Proprietary Model to figure out relative attractiveness of these asset classes.
- The scheme endeavours to achieve Reasonable Return with Moderate Volatility for its investors over medium to long term by diversifying investments in various Low-Correlated and Negatively Correlated Asset Classes. The scheme can be a Hassel-free and Tax-efficient^ way of investing in various asset classes via Single Mutual Fund Scheme with quick T+2 day Liquidity.

^Scheme is eligible for Long Term Capital Gain tax of 12.5% (+ Surcharge and Cess) after the holding period of more than 2 years as per Union Budget 2024 (23rd July 2024). Investors are requested to consult their tax consultant to understand individual nature of tax implications. Portfolio will be managed as per stated Investment objective, investment strategy & asset allocation in the Scheme Information Document (SID) and is subject to the changes within provisions of SID of the Scheme.

Load Structure

Entry Load[†]: Nil

Exit Load:

- Nil – for 10% of units purchased or switched-in on or before 7 days from date of allotment.
- All units redeemed /switched out in excess of the 10% load free units:
 - 0.25% - if Units are redeemed/switched-out on or before 7 days from date of allotment. Nil - if redeemed after 7 days.

[†]SEBI vide its circular no. SEBI/IMD/CIR No. 4/ 168230/09 dated June 30, 2009 has decided that there shall be no entry Load for all Mutual Fund Schemes.

Quantitative Information

Portfolio Beta, Standard Deviation, Sharpe Ratio and Tracking Error of the Scheme is not computed since the scheme has not completed 3 years from its inception.

Investment Objective

The investment objective of the Scheme is to seek to generate returns by predominantly investing in arbitrage opportunities in the cash and derivatives segments of the equity markets and by investing balance in debt and money market instruments. There is no assurance that the investment objective of the Scheme will be achieved.

Why to Invest in WhiteOak Capital Arbitrage Fund ?

- Arbitrage funds are relatively low-risk investment products. They exploit price differences prevail in two or more different markets or segments, thus reducing the exposure to market volatility.
- The Scheme is treated as equity-oriented fund for taxation purpose as per the Income Tax Act, investors who fall in higher tax brackets but seek tax-efficient returns may benefit from this Scheme.
- The scheme can be a good option for parking surplus money that will later be systematically switched or transferred via an STP into equity mutual fund schemes.
- Investors may consider parking surplus funds in the scheme for short-term periods of 3 months or above.

 - o 0.25% - if Units are redeemed/switched-out on or before 7 days from date of allotment. Nil - if redeemed after 7 days.

[§]SEBI vide its circular no. SEBI/IMD/CIR No. 4/ 168230/09 dated June 30, 2009 has decided that there shall be no entry Load for all Mutual Fund Schemes.

Quantitative Information

Portfolio Beta, Standard Deviation, Sharpe Ratio and Tracking Error of the Scheme is not computed since the scheme has not completed 3 years from its inception. Portfolio Turnover Ratio is not computed since the Scheme has not completed 1 year from its inception.

Investment Objective

The primary objective of the Scheme to provide capital appreciation by investing in Equity & equity related instruments, Arbitrage opportunities, and Debt & money market instruments. There is no assurance that the investment objective of the Scheme will be achieved.

Why to Invest in WhiteOak Capital Equity Savings Fund?

- > Investment in Equity Market can be very rewarding in the long term but the journey can be very volatile in short term due to various events, whereas investment in Debt instruments can provide stability as the returns are less volatile but are also relatively lesser than Equity Market over the long term.
- > The category 'Equity Savings Fund' rightly steps in at this place. The scheme is an open-ended hybrid funds that invest in equity, arbitrage, debt and other permissible asset class such as REITs/InvITs etc.
- > This category provides 'Stability from Debt and Arbitrage' along with 'Wealth Creation Opportunities from Equity' giving the best of both to investors.
- > Investors may consider parking surplus funds in the scheme for medium-term periods.

⁶SEBI vide its circular no. SEBI/IMD/CIR No. 4/ 168230/09 dated June 30, 2009 has decided that there shall be no entry Load for all Mutual Fund Schemes.

Investment Objective

The investment objective of the Scheme is to generate optimal returns consistent with moderate levels of risk and high liquidity by investing in high quality debt and money market instruments. There is no assurance that the investment objective of the Scheme will be achieved.

Why to Invest in WhiteOak Capital Liquid Fund ?

- > The Scheme focuses on short term deployment of funds.
- > The fund endeavors to generate optimal returns with high level of liquidity, minimal volatility & low to moderate credit risk.
- > The Scheme invests predominantly in short maturity and highly liquid securities like T-bills, Banks CD's, CPs and NCDs of highly rated corporates etc. with a maximum residual maturity of 91 days.
- > The fund seeks to follow stringent liquidity and credit parameters to optimize the risk-return proposition for the investors.
- > The Scheme endeavors to maintain high credit quality portfolio by analyzing the fundamental credit strength of issuers using in-house credit model.

Disclaimer: The above investment simulation is for understanding purpose only and should not be construed as a promise on minimum returns and safeguard of capital. The AMC / Mutual Fund is not guaranteeing or promising or forecasting any returns. Investors are advised to consult their financial advisor/consultant before taking any investment decision. SIP does not assure a profit or guarantee protection against a loss in a declining market. Please refer SID of the respective Schemes before investing. The performance of the schemes is benchmarked to the Total Return variant of the Index.

Benefits of Systematic Investment Plan (SIP)

The Fund offers flexible and convenient Systematic Investment Plan (SIP) facility. To illustrate the advantages of SIP investments, this is how your investments would have grown if you had invested say 10,000 systematically on the first Business Day of every month over a period of time in the Respective Scheme by using XIRR approach. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows with the correct allowance for the time impact of the transactions. .

1. SIP Performances is computed considering SIP Investment on 1st business day of every month.

2. "Since Inception SIP" performance are computed considering 1st instalment on allotment date and thereafter on 1st business day of every subsequent month

Disclaimer: The above investment simulation is for understanding purpose only and should not be construed as a promise on minimum returns and safeguard of capital. The AMC / Mutual Fund is not guaranteeing or promising or forecasting any returns. Investors are advised to consult their financial advisor/consultant before taking any investment decision. SIP does not assure a profit or guarantee protection against a loss in a declining market. Please refer SID of the respective Schemes before investing. The performance of the schemes is benchmarked to the Total Return variant of the Index.

Benefits of Systematic Investment Plan (SIP)

The Fund offers flexible and convenient Systematic Investment Plan (SIP) facility. To illustrate the advantages of SIP investments, this is how your investments would have grown if you had invested say 10,000 systematically on the first Business Day of every month over a period of time in the Respective Scheme by using XIRR approach. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows with the correct allowance for the time impact of the transactions. .

1.SIP Performances is computed considering SIP Investment on 1st business day of every month.

2."Since Inception SIP" performance are computed considering 1st instalment on allotment date and thereafter on 1st business day of every subsequent month

Disclaimer: Pursuant to payment of IDCW, the NAV of the IDCW Option(s) of the Scheme/Plan(s) falls to the extent of payout and statutory levy, if any. Past performance may or may not be sustained in future and should not be used as a basis for comparison with other investments. For Daily/ weekly / Fortnightly IDCW History please visit our website. <https://mf.whiteoakamc.com/>

Fund Manager: An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Minimum Application Amount: This is the minimum investment amount for a new investor in a mutual fund scheme

Minimum Additional Amount: This is the minimum investment amount for an existing investor in a mutual fund scheme

Yield to Maturity: The Yield to Maturity is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP: SIP or Systematic Investment Plan works on the principle of making periodic investments of fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests ₹500 every 15th of the month in an equity fund for a period of 3 years.

NAV: The NAV or the net Asset Value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark: A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include NIFTY, Sensex, BSE200, BSE500, 10 year G-Sec

Entry Load: A mutual fund may have sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry Load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is ₹100 and the entry load is 1%, the investor will enter the fund at ₹101.

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

Exit Load: Exit Load is charged at the time an investor redeems the units of a mutual fund. The exit load is deducted from the prevailing NAV at the time of redemption. For instance, if the NAV is ₹100 and the exit load is 1%, the redemption price would be ₹99 per unit.

Modified Duration: Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

Macaulay Duration : Macaulay duration is defined as the weighted average time to full recovery of principal and interest payments of a bond i.e. the weighted average maturity of cash flows. The weight of each cash flow is determined by dividing the present value of the cash flow by the price of the bond.

AUM: AUM or Assets under management refers to the recent /updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings: The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/ securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of scheme: The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund. Each of these categories may have sub-categories.

Rating Profile: Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.
